6362 Thorne Avenue  
Burnaby, B.C. V3N 2V1

# Institute of Power Engineers

## WHO IS THE INSTITUTE OF POWER ENGINEERS

- ✓ We are a Non-Profit National Society of Power Engineers, who are trained, educated and certified in the profession of maintenance and operation of power plants, heating plants and refrigeration plants,
- ✓ We are a society of Power Engineer members and other associates who meet regularly to find ways to provide better, more efficient and safer ways of operating the equipment that we have been given charge of,
- ✓ We join to find opportunities to educate others in our profession and to pass on information and educate the public of the hidden dangers of pressure containment equipment,
- ✓ We take active part in protecting the rights of the plant owners and the Power Engineers who operate those plants by actively participating in the revising of Regulations and Code Standards,
- ✓ We meet to give support and advice to younger members of our society, so they may become the best they can be in this profession in every Province and Territory of Canada, and
- ✓ We meet because we need to communicate the commitment we have for the safe and efficient operation of every boiler and pressure vessel in our charge. Because Safety is our business!
