

Steamworks Brewery is currently looking for an afternoon Jr. Maintenance Engineer / Cellar Person to join our growing team. This position will be responsible for conducting, maintaining, testing and repairing all beverage line machinery as needed, as well as helping run the cellar. Typical shifts will be from 12pm – 8pm.

Duties and Responsibilities

- Install, set-up, monitor, inspect, troubleshoot, calibrate, and operate production equipment, specifically all HVAC and Boiler Equipment and related machinery
- Undertake scheduled and emergency repairs and maintenance of production equipment and facility
- Ensure that production employees have the tools and equipment available to them when needed
- Communicate any repairs and maintenance that require outside contractors with supervisor
- Answer questions regarding operation of systems and equipment of entire facility
- Complete cellar operations including centrifuging, tank transfers and sanitation procedures
- Communicate with contractors to initiate equipment and facility repairs.
- Understand work order planning, scheduling and cost (material, resources, time) implications.
- Conduct preventative maintenance to all machines
- Daily completion of all documentation including but not limited to; daily log, downtime detail report, completed work orders, material requisitions and maintenance work requests.
- Work collaboratively with other departments to coordinate work and sharing of resources
- Able to troubleshoot breakdowns and repair equipment to minimize production downtime
- Adhere to all health and safety policies/procedures, good manufacturing practices, and wear the required personal protective equipment (PPE) while in the warehouse and production areas.
- Participate and assist brewery team members to meet operating objectives incorporating continuous improvements in all processes
- Other duties as assigned

Education and Experience Required

- 5th Class Power Engineer
- Forklift certification
- High mechanical aptitude
- Line maintenance experience within a food and beverage production environment
- Experience with refrigeration and boiler maintenance
- Experience working at a Brewery (an asset)

Other Required Skills

- Driven, self-motivated & task-orientated with strong attention-to-detail
- Ability to make judgement calls independently when needed

- Excellent oral and written communication skills
- Detail oriented with the ability to keep accurate records
- Strong logistics, record keeping and time management skills
- Outstanding team player with excellent work ethic
